An illustration of a man in a light blue shirt and dark pants standing next to a giant smartphone. He is pointing at the screen with his right hand. The smartphone screen displays a login form with a green checkmark at the top, a green input field, and several dark grey input fields below it. To the right of the phone is a small white table with a green plant on it.

Dashboard

Our online exam software provides details about the different metrics. Like the number of users and the number of questions. Also, administrators can focus on core areas, such as how many online tests are consumed or remain. With the category filter on the dashboard, it enables you to navigate the data with your own criteria. It shows greater control and flexibility. Data visualisation simplifies complex data and offers a snapshot of current performance. So, it streamlines the online examination process.

Question Bank

Conduct Exam offers a simple way to add or import different types of questions from Word and Excel formats. It supports the MCQs with multiple answers, Fill in the blanks, True and False, Essay, Matrix Match, Match the following. Admins or authorised users can upload Images, Formulas, and Videos for the exams. Also, educators can develop their own question bank with a question paper generator. The questions can be added under different subjects, lessons, and sub-lessons.

Add/Create Test

Adding a test has become easy with the Conduct Exam. With our online exam software, you can select questions from the question bank and set the date and time for test activation. Options for randomising or shuffling questions and answers are available. Our software supports creating exams in multiple languages. Users can preview or export tests with an easy click. Additionally, you can include test instructions to guide users before they begin.

Assign/Sell Online Test Series

Educational Institute can launch all India Test Series with Conduct Exam. You can assign test series to selected or all users. You can even sell them online by integrating a secure third-party payment gateway. Detailed reports on test series sales are accessible in the analytics section.

Add/Manage Users

With our online exam software, the admin can easily add or remove users under different batches or courses. Admins can send email or SMS notifications for account-related activities. Like new account creation and password reset for users. Teachers or educators can share news, study materials, and videos with users on our platform. Track the registrations of new users on both web and mobile app platforms

Analytics

As an administrator, you can view or export different types of reports for online tests. Analyse the performance of users with different reports. Detailed analytics cover test analysis, online test series sales, student registrations, and more.

Security

Conduct Exam backups of all the data every day. Our website is hosted on 24/7 secure AWS servers. Our servers are located in areas where we maintain power feeds, fibre links, generators, and battery backups regularly. It ensures the highest level of security for your data. Our system stores your password with an encryption solution.

About Us

An aptitude test is an assessment that is designed to evaluate a person's potential to excel in a specific task by assessing their natural abilities and skills rather than their acquired knowledge. Online aptitude tests are mainly used by organizations in their hiring process and these tests are also helpful for L&D programs. Apart from hiring, aptitude testing is also used for competitive and entrance examinations. Our free sample aptitude test questions with answers provide the best idea of the types of questions that an employment aptitude test contains.
